CSC 2510 002 Final Project Phase 3

RedDragon

Contributors: Rachel Robertson, Mallory Flesher, Zach Seitner

Agenda:

- CI/CD Organization
- Challenges
- Future Improvements
- Lessons Learned

CI/CD Organization

Standard Operating Procedure (STO)

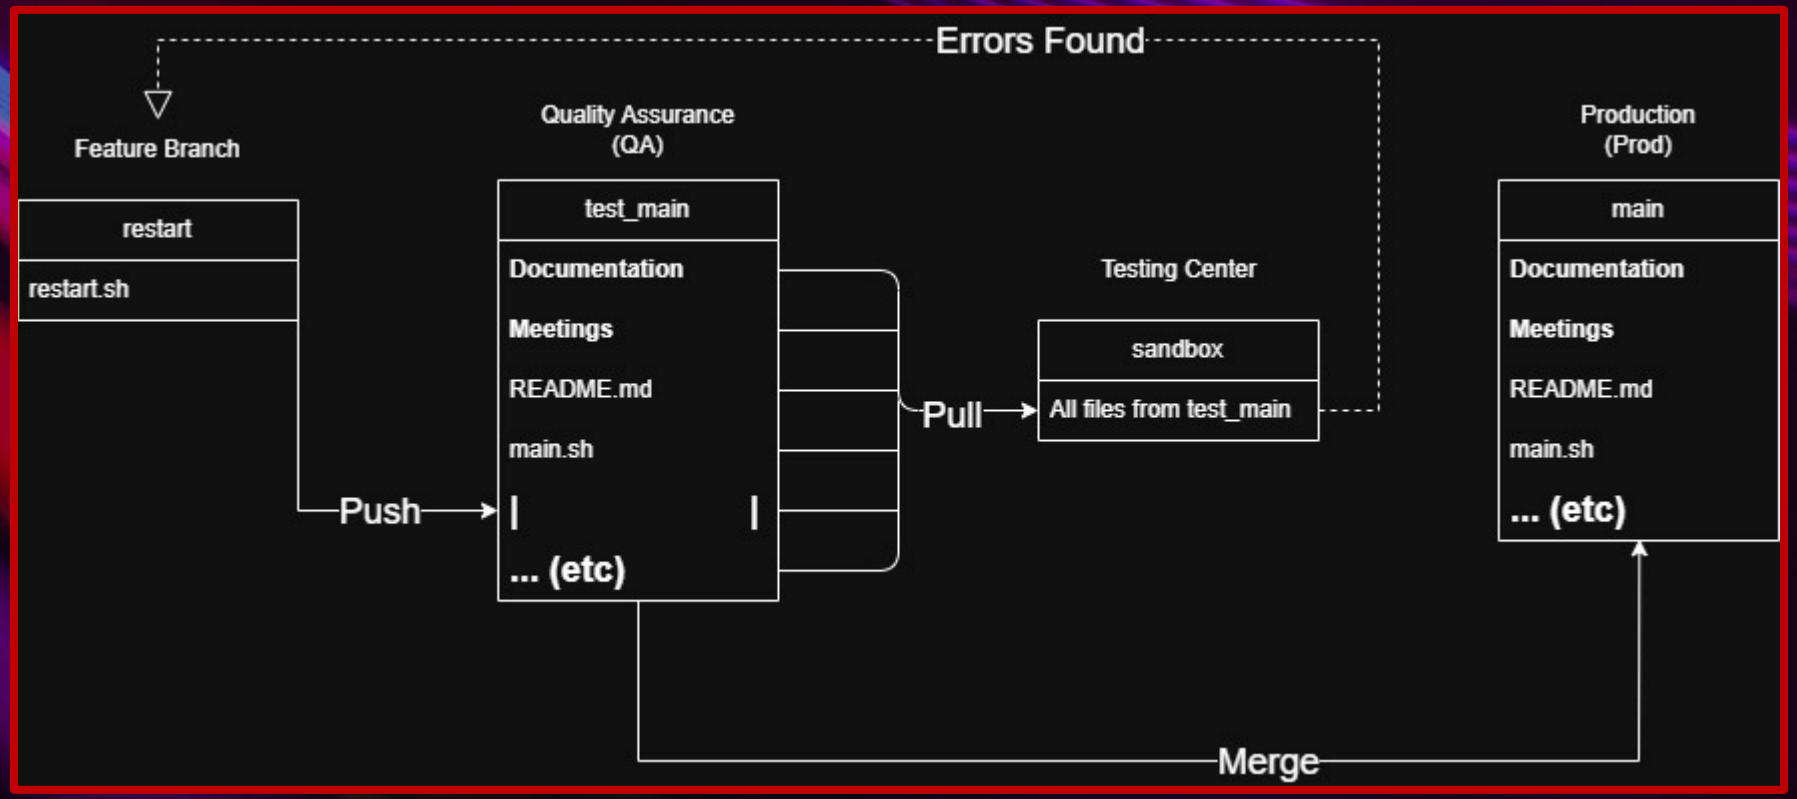
Standard Operating Procedure:

Do not push changes directly to main

1. Push from **feature branch to test_main**
2. Once in test_main the contents are **copied to sandbox** where they are **thoroughly tested**.
3. If any changes are needed, then we **return to the original feature branch** and repeat steps 1-2
4. Changes are **saved** in test_main until the next operable **change window**
5. Rebase test_main to main and **merge**

CI/CD Organization

Standard Operating Procedure (STO)



CI/CD Organization

Updates: Account creation V1.1

New Features:

- Show Users
- Delete User manually
- Show all users

Updates:

- Secure password creation
- Updated user manual
- Standardize naming conventions
- Modifications to licensing to prevent multiple authentications when entering the correct key

Challenges

Bug fixing and CI/CD Overview

Reading Data:

- **Pulling and formatting data from website**
- Parsing and array building in auto_add_user

Security:

- **Tweaks to password generation**
- Using AI for licensing

Organization:

- **Time Management**
- Integration

Challenges

Bug fixing and CI/CD

Password generation:

- Getting the random characters
- Assigning passwords to the correct users
- Integration with auto_add_user and manual_add

Challenges

Pulling and data formatting from Website

Pulling and data formatting from Website:

- **Irregular** data
- Learn **curl**
- Using agreed upon **format**
- Needed to be **completed earlier** than other features

Challenges
Time Management

Time Management:

- Set clear deadlines
- Regular meetings
- Late nights
- Working through class periods

Future Improvements

Rachel Robertson: Scrum Master

Leadership:

- Stay on top of setting deadlines
- Communicate more with my teammates
- Ensure that each team member has a fair load

Development:

- Pay more attention to naming conventions
- Documentation

Future Improvements

Zach Seitner: Test Director

Involvement:

- Be more Involved with new tasks
- Communication with upcoming tasks

Staying on top of things:

- Improve with time management
- Complect tasks efficiently

Future Improvements

Mallory Flesher: Lead Auditor

Auditing and Documentation:

- Keep better track of documentation and auditing
- Communication on possible issues that need attention

Development:

- Taking on less heavy loaded tasks
- Communicating when workload is too much

Lessons Learned

A Project in Review

Tools:

- Familiarity with **GitHub**
- Experience with **Ubuntu**
- **VirtualBox**
- How to develop a product with a **good team**

Teamwork:

- Having a great team makes everything **more fun**
- Clear deadlines and expectations make teams **efficient**

Lessons Learned
